# Reservemyslip.Com

Del Webb Lake Oconee User Guide Reservemyslip.Com is an online boat slip reservation system. This system has a community module that has been customized for the Del Webb Lake Oconee HOA.

To access the system enter the URL <u>www.reservemyslip.com</u> from your web browser and you will see the main entry page.

The main entry page has a Menu in the top left corner of the image. If you hover your mouse over the word Menu you will see the menu selections. From the Menu click on **Select Property** to see the following page.

From the Select property page click in the middle of the Del Webb Lake Oconee image to display the community specific page.

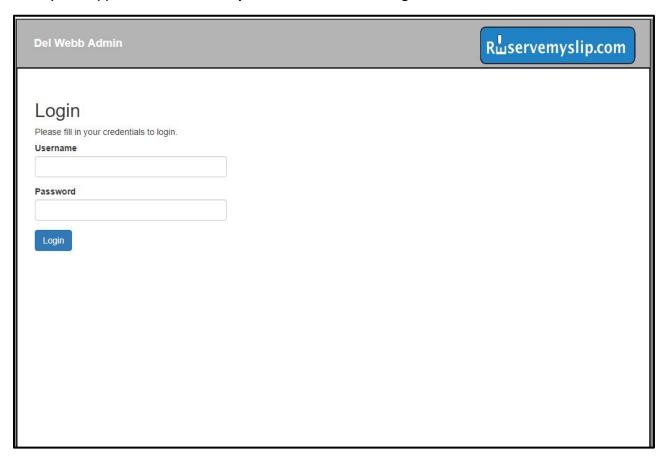

From the community page you can click on the large orange button to log into the system.

**Notes:** You should bookmark this page so you can access the system faster the next time you log in.

The community page has links to the <u>Boat slip reservation requirements</u>, <u>the Dock layout document</u>, and this <u>User Guide</u>. All community users have access to this information.

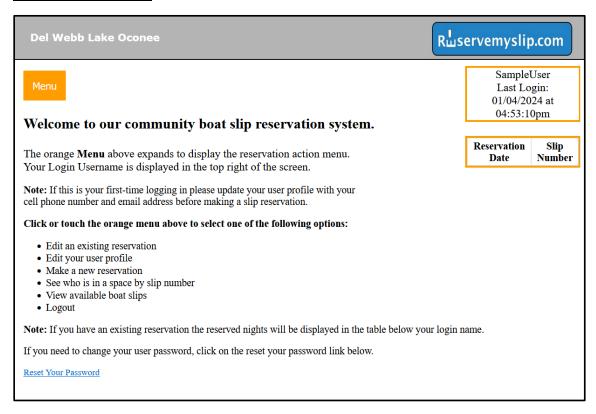

Enter your supplied **username** and **password** and click on **Login**.

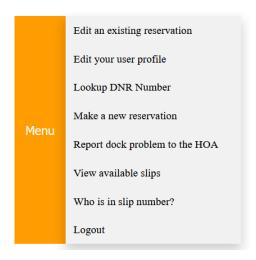

**Note:** if you want to go back to the home page just click on the Reservemyslip.com logo at the top right of the screen.

After successfully logging into the system you will see the welcome page. Your login name will be displayed in the top right corner where [SampleUser] is displayed.

If this is the first time you have logged in, you should change your password by clicking on the <u>Reset Your Password</u> link.

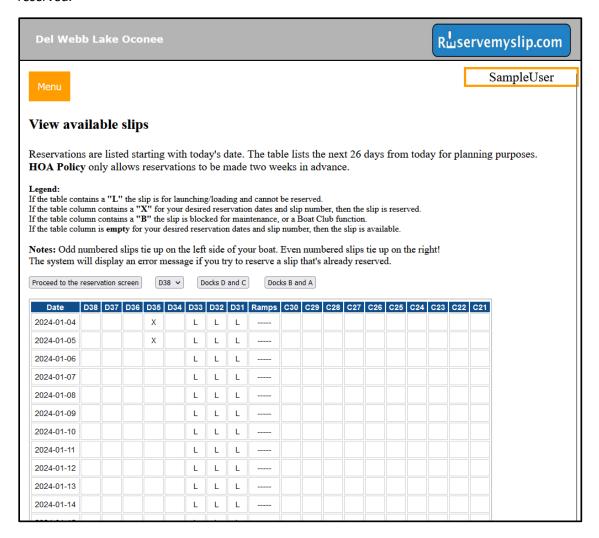

This page is the main entry point to the system. Click on the orange Menu button to see the options for reservation management.

You should start by browsing the available slips by clicking on the link titled **View available slips**.

You will then be presented with the slip table which shows which slips are available, and which slips are reserved.

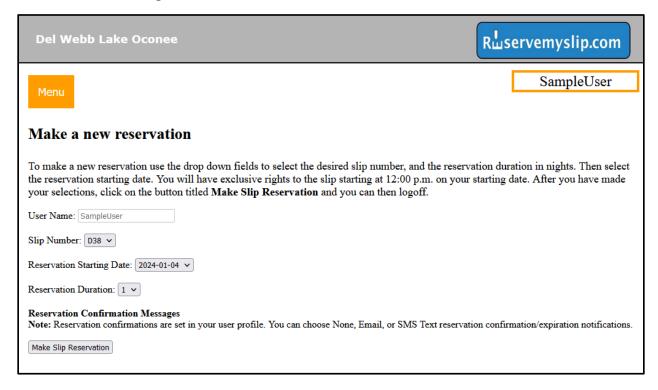

The HOA has four docks which are A, B, C, and D. When you first access this page, you will see dock D and C. To browse for available slips on docks B and A click the button titled **Docks B and A**.

There is a legend on the page which indicates whether slips are reserved [X], available [ ], blocked for maintenance [B], or reserved for loading and launching [L].

The loading and launching slips are used when you are loading guests, or you have just launched your boat prior to moving to your assigned slip. They can only be used for 15 minutes at a time.

After you have selected a slip for the date range that you want to reserve you can use the dropdown slip selector at the top of the table to save the slip number. Then click on the button titled **Proceed to the reservation screen** to make your reservation. **Note:** Slip D38 was selected in this example.

When the reservation screen is displayed your desired slip will be selected and all you need to do is to select the starting date and duration.

Your username will be displayed in the **Username field**, and this cannot be changed!

There are drop down selection boxes for the desired <u>Slip number</u>, <u>Reservation Starting Date</u>, and <u>Reservation Duration</u>. The starting date will always be populated with date you access the system. You can change the starting date to make a reservation further out like next week for example. It does not provide a calendar interface. Users are only allowed to select dates 15 nights in advance. As with a hotel reservation you are reserving nightly stays.

The reservation duration is limited to 5 nights.

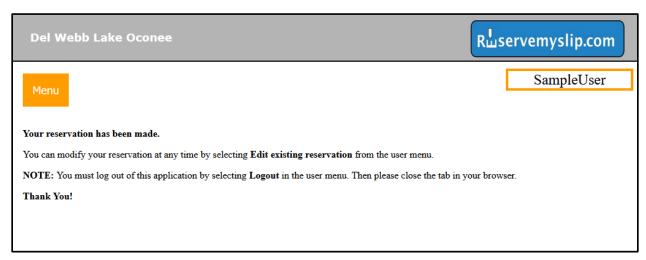

**Note:** On the last full day of your reservation, you can renew your reservation after 12:00 p.m. if a slip is available.

If you wish to receive a reservation confirmation message from the system you need to specify what type of notification that you want to receive in your user profile.

You can send yourself a SMS text confirmation, or an Email. If you select SMS text your mobile phone number must be added to your User Profile.

After you have made your selections, click on the **Make Slip Reservation** button to make your reservation.

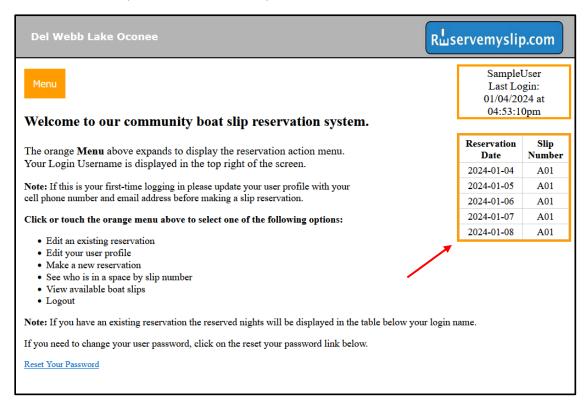

You will see a confirmation message displayed stating that your reservation has been made! If you want to verify your reservation you can access the slip map again to see that your slip and time period has been marked reserved!

That's all you need to do to make a reservation! You should then click on the Menu button and log out of the system.

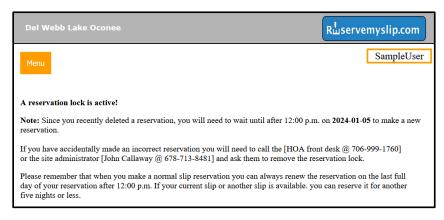

### **Existing Slip Reservation Reminder**

If you already have an existing slip reservation you will be reminded of the reservation on the welcome screen! (See Red arrow below)

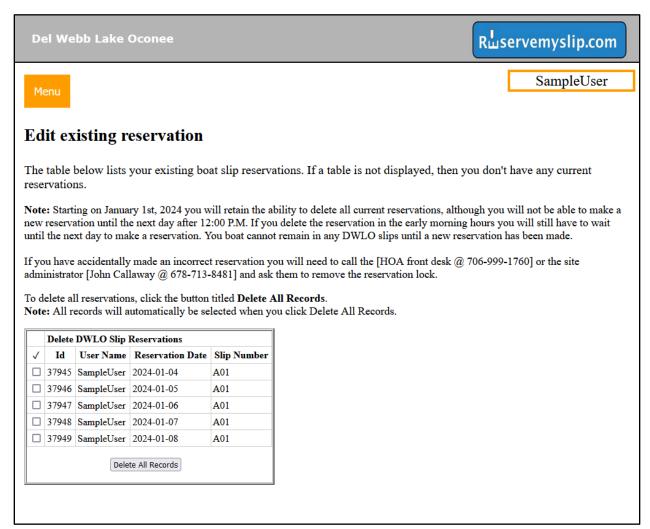

If you decide to cancel your reservation due to weather or a change of plans you can delete the reservation by selecting Edit an Existing Reservation in the menu. From this screen you will be able to delete your reservation.

**Note:** Starting in January 2024 a user will have to wait a day before they can make a new reservation if they delete an existing reservation. If you try to make a new reservation after deleting one, you will see the message below.

#### Edit an existing reservation

This screen allows you to delete your existing reservation. Starting in January 2024 you will only be able to delete the entire reservation. If you do delete your reservation, you will be prohibited from making a new reservation for one day.

**Note:** If you have accidentally reserved the wrong slip, you will need to call the HOA front desk or the System Administrator and ask them to remove the reservation lock. They will review your reservation history and decide if the lock can be removed.

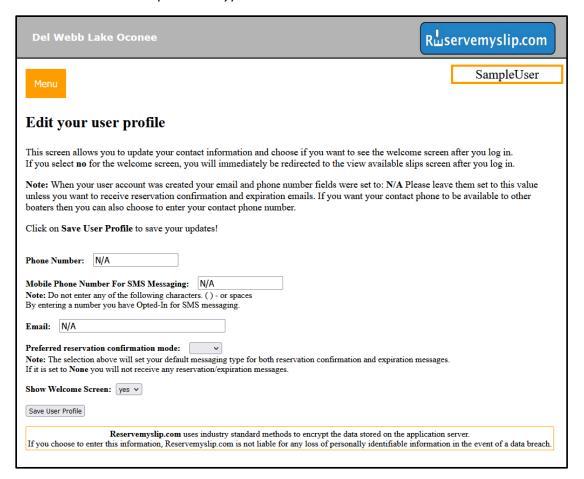

If you have deleted your reservation after two or three nights, you more than likely will have to wait another day to reserve a slip. This feature ensures that all residents in the community have equal access to a slip reservation.

It is important to remember that all boats in DWLO slips must have a valid reservation. If you have deleted your reservation, then you boat needs to be moved back into storage or returned to the marina where it is stored! <u>Leaving you boat in a slip without a valid reservation is a slip usage violation!</u>

#### Edit Your User Profile

The first time you log into the system, you should access the User Profile screen and enter your contact phone and email address. If you choose to not enter this information due to privacy concerns, please leave the fields set to **N/A**.

The mobile phone number for SMS messaging field is used to enter your 10-digit mobile phone number. Please omit spaces or hyphens.

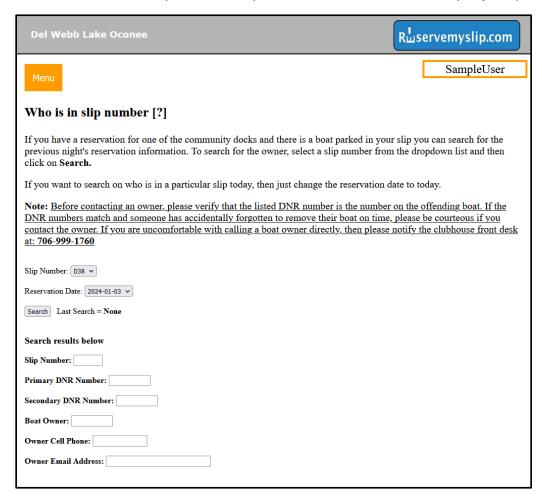

The **Preferred reservation confirmation mode** can be set to (None, Email or SMS)

The **Show Welcome Screen** dropdown allows you to choose if you want to see the welcome screen or slip map as soon as you log in. If you select No, the first screen you see after logging in will be the slip map. You can always access the welcome screen from the menu.

**Note:** If you want to take advantage of reservation confirmation and expiration emails you must enter an email address or a SMS number. It's not to uncommon for people to have more than one email address. If you are concerned about privacy, use an email address that is not associated with more sensitive targets such as you bank or other financial service companies.

#### Who is in slip number?

We all want to be helpful and if you see a problem with someone's boat you should let them know. The web-based system allows you to see who has reserved a specific slip.

To use this feature, select the slip number from the drop-down menu and select the reservation date. The systems default is the previous day which lets you know who had the slip last night. Perhaps they forgot to move their boat at 11:00 a.m. and if this is the case you can politely ask them to move it.

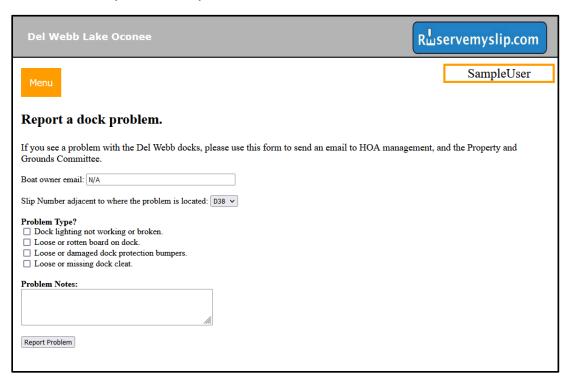

If you see a problem with a boat today, just select today's date to see who has the slip reserved.

The screen will display the matching information and automatically reset to the default slip number D38. To search again, just select the slip number, the optional reservation date and then click **Search**.

## Report a dock problem to the HOA

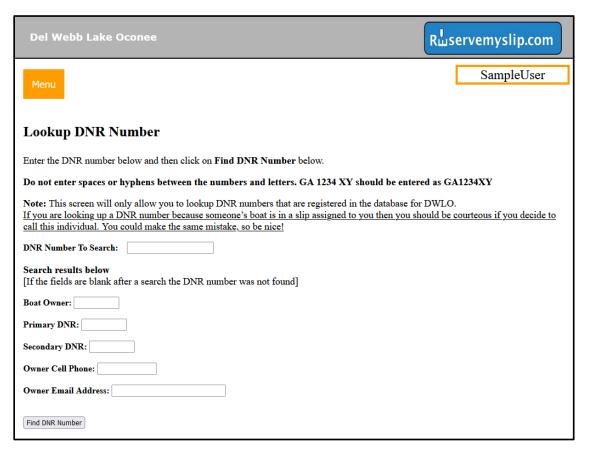

If you see a problem such as a rotten board or a missing cleat you can use this form to send a messsage to the HOA office.

If you have entered your email address in the user profile it will be displayed on this form. If not, you should type your name in the problem notes field so the HOA knows who reported the problem.

#### Lookup DNR Number

The registration number on boats is formatted with spaces between the state and the remaining registration numbers. Example: GA 1234 ZY
When you use this screen to lookup a DNR number enter the information without spaces. In the example above, you would enter: GA1234ZY and then click
Find DNR Number to do a search.

**Note:** The reservation system contains DNR numbers for all boats registered in the system. It also has the most recent DNR numbers for Freedom Boat Club boats. If the system does not find the DNR number in question then you can call the HOA office. They can access every DNR number in the state.

If you find that a boat is in your reserved slip and you cannot determine who it belongs to then please call the HOA office!

#### **Frequently Asked Questions**

- Why can I only make a reservation for up to 5 nights?
   Answer: The HOA wants to make sure that all boat owners or resident Freedom Boat Club members have equal access to overnight slip mooring. By restricting reservation duration, you effectively allow other owners better access to available slips.
- Can you split a reservation between two or more slips?
   Answer: No, you can only make one reservation at a time for a single slip.
- Why can't I make a reservation further out than 15 days from today's date?
   Answer: The HOA wants to make sure that all boat owners or resident Freedom Boat Club members have equal access to overnight slip mooring. If people could make reservations too far in advance, we could easily use up our limited resource.
- Can I make back to back slip reservations?

  Answer: Yes, if a slip is available. When there is one night remaining on your reservation the system will allow you to make a new reservation for up to five nights. However, you may not be able to reserve the same slip.
- If I can't get a preferred slip right now, can I move my boat when a preferred slip becomes available?
   Answer: Yes, although you will need to call the HOA office and have them move you to another slip. If you delete your reservation, you will be prevented from making a new reservation for one day.
- If I don't have access to a computer, tablet, or smartphone can the Del Webb front desk
  make a reservation for me?

  Answer: Yes, although it's preferred that you manage your own reservations. The front desk staff
  is very busy at times and it may be a while before they can make a reservation on your behalf.
  They also will not make reservations over the weekend since the desk is manned by part time
  employees.
